Getting you started on a clear path
Welcome to the Philips InCourage family. Following this quick reference will help you get familiar with the features of your system as you start your sessions. Please keep in mind the standard default pressure is set at 60%. Be sure to follow the pressure settings and therapy frequency prescribed by your healthcare provider.

Put the vest on and connect the buckles located on the front of the vest. The hoses are interchangeable and can be flipped. You do not need to worry about which end is attached to the therapy unit or the vest.

Easy-to-clean
Machine wash and dry without disassembly.

Quickfit sizing
Your vest is equipped with blue, white and yellow quickfit tabs. Once the tabs are set, the size is repeatable and there is no need to adjust before your next session.

Active venting
Designed to immediately release air in the vest in response to the user’s breath so the vest feels less constricted, allowing a deeper inhale.

User-friendly control panel
One-button start and simple programming for a wide range of therapy options.

Effortless filter replacement
Easy pop-off panel makes filter changes simple.

Put the vest on and connect the buckles located on the front of the vest. The hoses are interchangeable and can be flipped. You do not need to worry about which end is attached to the therapy unit or the vest.

Quick start session
To run a quick start session (30-minute session with ramping): From the startup screen, select quick start and your session will begin.

Adjust pressure by pressing either down or up.

Press pause to temporarily stop the session.

When the session pauses, press run to resume the session or end to return to the startup screen.

Auto pause session
To run an auto pause session (30-minute session with ramping that pauses every five minutes): From the startup screen, press auto pause and your session will begin.

Adjust pressure by pressing either down or up.

When a pause time is set, a countdown timer is displayed and therapy automatically resumes at 0:00. The run button resumes therapy at any time. End returns to the startup screen.

Keeping it clean
The InCourage comfort vest is machine-washable and dryer-safe without disassembly. Simply follow these steps:
1. Buckle all straps.
2. Insert the supplied red plugs into both vest ports. Test to ensure the rim of the plug is secure and fits tightly.
3. Wash on gentle or normal cycle using mild detergent in warm water.
4. Remove plugs from ports and tumble-dry on low heat until dry.
5. Ensure all moisture is removed from the vest by attaching one hose onto the top port of the therapy unit. Attach the other end of the hose onto the port left open.
6. Unbuckle all straps of the comfort vest on flat surface. Run the therapy unit for 20 minutes at a frequency of 5 Hz and at 100% pressure.
